Re:

Construction of Substation Concrete Retaining Wall Amendment, Canyon Fuel Company, LLC, SUFCO Mine C/041/002

Dear Permit Supervisor:

The enclosed eight complete clean copies of the Substation Concrete Retaining Wall Amendment are being submitted for approval to construct a concrete retaining wall to reroute the road past the lower substation. Attached are DOGM forms C-1 and C-2 and appropriate pages.

This new substation concrete retaining wall will not affect any new disturbance to the permitted area or any change in runoff, vegetation, and topsoil. MRP Table 5-4 "Description of Existing Structures" page 5-45 has been updated and is enclosed. New bond calculation sheets and updated surface facility maps (Plates 5-2A and 5-2B) are enclosed. The bond cost estimate requirements for the proposed new substation concrete retaining wall construction is well within the present Sufco posted bond.

Sufco needs approval of this amendment as soon as possible to start construction this summer. If you have any questions or need additional information, please contact Mike Davis at (435) 286-4421.

Sincerely,

CANYON FUEL COMPANY, LLC

SUFCO Mine
